

spectratherm™ 1200

A versatile, easy to use Short Wave Infra-Red Curing System for body shops demanding high quality and reliability at a reasonable price.

 **spectratek®**

Features of a Spectratherm™ 1200 Short Wave IR curing system:

- **Versatile:**
cures on any substrate
cures putty or primer.
- **Rapid temperature climb:**
maximum heat transfer.
- **Automatic timed shut-off:**
reduces chance of damage to finish
due to overheating.
- **Uniform, focused cure area -
no hot or cold spots:**
full focused IR reflector.
curing area:
14" x 12" = 168 in² (35cm x 30cm = 1050cm²).
distance to vehicle: 12" (30cm).
- **Simple controls:**
solid state switching
variable cure timer
long lasting, durable.
- **Easy to operate:**
effortless lamp unit adjustment
"push and go" operation
short, timer controlled curing times
(polyester putties in approx 4 minutes,
water and solvent based products in
under 10 minutes).

PAINT MATERIAL	TOTAL CURING TIME
Polyester Filler/Stopper	2 - 3 minutes
Primer	3 - 8 minutes
Water-Thinnable Filler	7 - 9 minutes
Non-Sanding	2 - 7 minutes
Top Coat	7-10 minutes

- **Easy to maintain:**
removable grill
cleanable, solvent resistant reflector
interchangeable bulbs.
- **Built-in safety features:**
full NRTL listing and CSA approval.
- **Economical:**
lower purchase price and running
costs than other conventional methods.
- **Spectratek quality design,
construction and service:**
highest quality components
designed and built in North America
compact, modular design
efficient on space
lightweight, strong, stable and
rugged construction
robust, reliable electronics designed
for the harshest environment
comprehensive warranty.
- **Power requirements:**
110 volt and 220/240 volt models
available.

Solid Backing by Experts in the Industry

The founders of Spectratek have years of experience in the automotive paint field and a high level of technical expertise in Short Wave IR technology as it applies to the automotive industry.

Spectratek is committed to developing the highest quality products and invests in extensive research, development, and testing. Their ongoing research ensures that the products they develop will continue to meet effectively the needs of auto-body shops today and in the future.

All Spectratek products are supported by fully qualified service and distribution facilities. Servicing can be conducted on-site to minimize down-time and cost.

Contact Spectratek today.

Due to our commitment to quality and service, design & specifications may change without notice.
